"where the lines meet"

istanbul

sofa

The most important feature of Istanbul is that you can replace it with the coating you want. Also, isn't the wooden arm detail shockingly stylish? In addition, it provides a high level of comfort and convenience in use. Of course, we leave the direction and design of the sleeve detail to you. Considering the integration of leather details with wood, don't you think it's a very different design?

beans

sofa

ARROW

Arrow corner sofa

You can color and design the comfortable and stylish arrow set, which has multi-piece modules, as you wish.

ARROW teddy

The arrow model enriches itself with its different combinations and can be designed according to the style of the space, making it very different.

ORLANDO

The Orlando model has a very useful and practical mechanism. Additionally, it takes up very little space in terms of packaging. It provides ultra softness with intensive lamination application on soft sponge. It differentiates itself with its practical use, wooden details and brass-plated metal details. We are sure you will love it very much.

NEW GALAXY

The reason why we differentiate them as GALAXY and NEW GALAXY is that GALAXY can be combined with teddy (plush) fabrics. As for NEW GALAXY, we have presented two different options as an alternative to offer options with different color chart presentations. We offered such a choice because the design was liked very much and the demands were high. This design, suitable for every space, will add difference to your spaces with its unique form.

BALLOON

Balloon and Slice model has a plush structure fabric selection called teddy. This design, designed with the soft selection of fabric and sponge, has become the most helpful products for different space designs.

SLICE

MASERATTI

MASERATTI sofa set, we are thinking about how we can understand the comfort of this product, because it is completely covered with foam and we use all the foam pads extra softly. Believe me, the comfort of this product is at its peak. Thanks to your choice of fabric and the piece modules you want, it can be used as a corner set, a sofa set or even a decoration module. We have bad news for people who love television. The complaints we received from our customers who used this armchair told us that they fell asleep because of the comfort of the product while watching movies or programs :)

TIGER SOFA

HARMONY

beans

teddy

The design structure with its curved lines is actually mostly used for decoration. It is a model that can be used with many alternatives in coffee corners, waiting rooms and glass front decorations. We love this product very much. And this product shows us that we are different from our other competitors. With our slogan of magnificent designs, we are moving forward by planning to add different designs to our product options every day.

ASEL

Be someone who spreads warmth. Be someone who gives a kind smile. Be the person to take an extra second to say thank you. Remind your kids how wonderful they are. Be the kindness you want to see in the world because it truly only takes one little act of kindness to change someone's life. We are all just human-we are all working through our own stories trying to find our light So why don't shine a light in other's lives too? Find the people and places that make you feel at home. Find the ones who take care of your soul and make you feel like you can be completely yourself around them Find the places that make you want to see even more of the world and the ones that make you happy to be alive... And whenever you find one of these people or places, hold onto them so tight.

fotelja

Multicolored spaces can be decorated. It is a product that has achieved peak durability with its polyurethane skeleton structure and metal reinforcement. The design is a rotating mechanism and has a soft seat, making it the best product for relaxing.
